Abstract

The author's visits to Turkey were numerous. They mostly related to visits to Istanbul, but also to cities in the Asian part of Turkey. Apart from Istanbul, which is located in both the European and Asian parts of Turkey, the author visited the city of Çanakkale, which, like Istanbul, was developed in both the European and Asian parts of Turkey. The visits to Istanbul had different reasons: a visit to Yildiz Technical University as part of the inter-faculty cooperation between the two faculties (when the author was the dean of the Faculty of Architecture at the University of Sarajevo), a visit to the Research Center for Islamic History, Art and Culture (IRCICA) at a large number of scientific conferences (and participation in summer schools organized by IRCICA throughout Turkey) and rest and leisure. The visit to the Mardin city took place as part of the Summer School, June 27 - July 29, 2011.

Keywords: Turkey, Mardin, Synergy of natural environment, social environment and man

1. Introduction

The author's visits to Turkey were numerous. They mostly related to visits to Istanbul, but also to cities in the Asian part of Turkey. Apart from Istanbul, which is located in both the European and Asian parts of Turkey, the author visited the city of Çanakkale, which, like Istanbul, was developed in both the European and Asian parts of Turkey. The visits to Istanbul had different reasons: a visit to Yildiz Technical University as part of the inter-faculty cooperation between the two faculties (when the author was the dean of the Faculty of Architecture at the University of Sarajevo), a visit to the Research Center for Islamic History, Art and Culture (IRCICA) at a large number of scientific conferences (and participation in summer schools organized by IRCICA throughout Turkey) and rest and leisure. The visit to the Mardin city took place as part of the Summer School, June 27 - July 29, 2011 (Figures 1,2,3). This work is the result of a series of study trips to Turkey. The aim of the study trips was to get to know the cities on the spot and through their analysis (through 'cabinet work') to contribute to the author's theory of "Architecturally defined space" [1, 2, 3, 4, 5].

Fig 3: Mardin. Location

Mardin is a city (with about 129,864 inhabitants, 2021) ^[6] located in the southeast of Turkey, 744 km from Ankara and 1094 km from Istanbul (Geographic coordinates: 37°18'46.84"N, 40°44'04.52"E, Elevation: 1069 m). The city is known for its old town on a stone hill above the Tigris River. The first known inhabitants of this area (around 3000 BC) were the Subarians. Then followed a long procession of peoples and cultures: Elamites (ca. 3230 BC), Babylonians (ca. 1894 BC), Hittites (ca. 1600 BC), Assyrians, Persians, Hellenes, Romans, Byzantium, Umayyads (692, Caliphate),

Abbasids (824, Caliphate), Seljuks (Artukids), Mongols (1235-1243, Ilkhanids), Ottoman Empire (1517). During the reign of Emperor Cyrus (Cyrus the Great, 600-530 BC), the area of Mardin and all of Anatolia became part of Persia. The successors of Emperor Cyrus, Emperor Cambyses II (Cambyses II, ruled 530-522 BC) and Emperor Darius I (Darius I, 550-486 BC) consolidated their power there. The old name for the city of Mardin, Izalā, is of Persian origin from the time of the Achaemenid Empire (Achaemenid, 546-332 BC). During the time of Alexander the Great (356-332

BC), this area was part of the huge Empire of Alexander the Great. The Roman emperor Trajan (Imperator Caesar Nerva Traianus Divi Nervae filius Augustus, 53-117) conquered this area (115-117), which became part of the Roman province of Mesopotamia. Roman rule in this area was strengthened a little later (198) by Emperor Septimius Severus (Lucius Septimius Severus Augustus, 145-211). In the time of ancient Rome, the present-day city of Mardin was called Marida (Merida) after the name "fortress" from the Neo-Aramaic and Syriac languages [7]. From the end of the 2nd century AD. Until the beginning of the 3rd century, the city was under the rule of the Kingdom of Osroene (Arabic: الرها مملكة, existed 132 BC-216). At this time, Assyrian Christianity (Church of the East, 1st-4th century) was strong, and in the city of Marida there was its Nisibis monastery, after which the city got the name Mountain of Nisibis or Mt. She went out. At the end of the 3rd century, the city of Mardin and the Kingdom of Osroene was conquered by Shapur II (Shapur II the Great, 309-379), the tenth shahanshah (Shahanshah) and included it in the Sasanian Empire (Sasanian Empire, existed 224-651), as part of his province of Assuristan [8]. The Roman emperor Theodosius I the Great (Flavius Theodosius, 347-395) divided the Roman Empire (in 395) by assigning its western part to his son Honorius (Flavius Honorius, 384-423) and the eastern part to his son Arcadius (Flavius Arcadius Augustus, 377-408). The area of Mardin became part of the Eastern Roman Empire (Byzantium). In the struggle for supremacy in this area, Byzantium was in constant conflict with its neighbors the Persians, and then with the new emerging power from Central Asia - the Seljuks and the rising power, the Islamic Empire (Khilafate). The Arab Umayyad dynasty occupied this area in 639. The Turkish Artukid dynasty (Turkish: Artuklu

Beyliği) occupied this area in the 11th century, when its central cities were Hisn-ı Keyf (Hisnkeyfa, 1102-1231) and Mardin (1106-1186). It was a fruitful period for the city of Mardin when a large number of significant buildings were built there, which are today a valuable cultural heritage of the city [9]. The land of the Artukid dynasty was conquered (1235-1243) by the Mongols, but it was still ruled by the Artukids, as vassals of the Mongols. Later, Mardin was included in the federation of Oghuz Turkic tribes, Akkoyunlu (Aq Qoyunlu, existed 1378-1501), which included the area of eastern Turkey, a large part of today's Iran and Iraq, Armenia and Azerbaijan. After the Ottoman-Safavid War (Battle of Chaldiran, 1514) during the reign of Ottoman Sultan Selim I (1470-1520), the Ottoman army led by Bıyıklı Mehmet Pasha conquered Mardin (1717). Mardin remained part of the Ottoman Empire until its collapse (1922), and then part of the Republic of Turkey (1923-present).

2. Natural resources and sights

Mardin has a hot Mediterranean climate, with dry and hot summers and cold (and often snowy) winters. The highest summer temperature is 38.1 °C (July), the lowest summer temperature is 18.2 °C (June), while the highest winter temperature is 10.1 °C (December), and the lowest winter temperature is -0.5 °C (January). Temperatures in the summer period reach values of up to 40 °C. The appearance of snow is common between December and March, but it stays for a week or two. The highest ever recorded temperature in Mardin (and throughout Turkey) was 48.8 °C (August 14, 1993). The average annual precipitation is 641.4 mm/m², while the number of sunny hours per year is 3000 [10] (Figure 4).

Fig 4: Climate and Average Weather Year Round in Mardin, Turkey

Mardin is located in the geographical area of Mesopotamia, the area where one of the oldest, richest and longest-lived cultures in history developed. This culture is a gift of the Euphrates and Tigris rivers, wide fields and a favorable climate. Natural resources have generated diverse and rich agricultural production (agriculture, fruit growing, animal husbandry), (Figures 5-11). The high stone hill was an ideal location for the construction of a fortress from which a wide

area could be monitored and defended, and the emergence of the city on the slopes and at the foot of the stone hill with the fortress was an expected consequence of social relations where the city was created as a place of exchange of vast natural and man-made goods [11]. The branched network of larger and smaller water streams was also the driving force for many water mills and stupas for making wool cloth (Figure 10).

3. Architectural cultural and historical heritage

Mardin, with its present-day appearance and architecture, reflects the synergistic unity of the natural and social environment. Because of the physical and spiritual preservation of this unity, the city has become an "open-air museum" which is widely recognized, so the "Cultural Karajolik of Mardin" is included in the UNESCO list of world cultural heritage ^[12].

Mardin Fortress (Turkish: Mardin Kale, English: Mardin

Castle), known as the Eagle's Nest, is one of the few fortresses in the world that has been used as a military fortress since its foundation (around 1000 BC) until today. This testifies to the exceptional geographical strategic importance of this fortress (city) throughout its history ^[13]. The fortress is located on a stone hill, 1000 m above the surrounding plains, and the dimensions of its base are 1000 m x 30-150 m (Figure 12).

Red Church/St. George Church (Turkish: Kizil Kilise, Armenian: Surp Kevork) is an Armenian church, built in 420^[15]. Due to the narrow terrain, the church does not have an entrance porch, but the church is accessed from the street

through a narrow arched passage. Next to the church is an old cemetery that has been devastated over time. The church was renovated in 2015 (Figure 15).

The Monastery of St. Ananias (Turkish: Daryülzafaran Manastırı) is located 5 km southeast of Mardin. It is a monastery of the Syrian Orthodox Church founded in 493 and is one of the oldest monasteries in the world. From 1160 to 1932, it was the seat of the Syrian Orthodox Patriarch until the patriarchate moved to the Syrian capital, Damascus. The monastery complex has three churches arranged around an inner courtyard framed by a portico with arcades. The

building structure of the monastery originally dates back to the 5th century, but it was demolished several times, first by the Persians and then by the Mongols. Buried in the rocky ground, below the level of the access yard, there is a sanctuary hall with a 300-year-old wooden throne and floor mosaics (Figure 16). Sun worshipers have been using it since 2000 BC.

Dara (Greek: Δάρας, Turkish: Dara) was an important ancient Roman city-fort, founded (505) in northern Mesopotamia, on the border with Sassanid Persia. In Roman-Persian conflicts

in the 6th century (the famous battle of Dara, 530). Today, the Turkish village of Oğuz is here (Figure 17).

Mor Behnam Church (Turkish: Kırklar Kilisesi) is a Syrian Orthodox church built (569) in the name of Mor Behnam and Mort Sar, son and daughter of the ruler. The church is located in the Şar quarter, in the center of Mardin. The church has a

spacious courtyard, which is a rare case for Marda (due to the steep and narrow terrain for construction). The church is known for its many details of stone carving, both in the interior and exterior ^[16] (Figure 18).

Şeyh Mahmut Tomb (Turkish: Şeyh Mahmut Türbesi) is located in the village of Kırkdirek, about 55 km north of Mardin. Şeyh Mahmut is a Sufi scholar who has many followers. He came to the area of Mardin (the city of Sason) during the time of the caliph Omer (580-644, caliph 634-644), and then moved to the village of Yukarı Kıratlı in the

Batman district, where he died (698). His turbe is one of the most beautiful buildings of its kind in the world. This place is visited every year (on the second Friday of May), in just two days, by over 100 thousand people from the regions of Mardin and Diyarbakir, as if to pay their respects to Şeyh Mahmut (Figure 19).

Mardin Museum (Turkish: Mardin Müzesi) is located in the city center, next to the monument to Mustafa Kemal Pasha Atatürk. The museum is arranged in the former Church of Mother Mary (Turkish: Mardin Meryem Ana Kilisesi) built (1895) by İgnatios Behnam Banni, Syrian Catholic Patriarchate. The Turkish government bought (1988) this church from the Syrian Catholic Foundation and arranged a museum in it (1995). Until then, the museum was housed in the Zinciriye madrasa. The museum building, like all important buildings in Mardin, is built of local stone the color

of desert sand, with many stone carvings. The museum is arranged over three floors. On the ground floor of the building there is a reception, a conference room, a cafeteria and an exhibition area. On the first floor there is a warehouse, a library and an ethnographic collection. On the second floor, there is a hall with archaeological exhibits discovered in the vicinity of Mardin. The exhibits cover the time from 7000 BC to the present day and thus testify to the rich history of Mardin (Figure 38).

4. Conclusion

The author's visits to Turkey were numerous. They mostly related to visits to Istanbul, but also to cities in the Asian part of Turkey. Apart from Istanbul, which is located in both the European and Asian parts of Turkey, the author visited the city of Çanakkale, which, like Istanbul, was developed in both the European and Asian parts of Turkey. The visits had different reasons: the visits to Yildiz Technical University, Karadeniz Technical University, Tokat Gaziosmanpaşa University, for example, were arranged within the framework of inter-faculty cooperation of the Faculty of Architecture of the University of Sarajevo (when the author was the dean of the Faculty of Architecture of the University of Sarajevo) with the aforementioned universities, with the coordination of the Research Center for Islamic History, Art and Culture (IRCICA) and Professor Amir Pasic. The visit to the Mardin city took place as part of the Summer School, June 27 - July 29, 2011. The modern Republic of Turkey is a geographical area where rich layers of material culture are "stacked" (and preserved), from the earliest prehistory to the present day. It is safe to say that "Turkey is the world's museum of culture". Professors from Turkey and all over the world, as well as students, participated in the mentioned summer schools as lecturers. What the professors and students saw on the spot greatly enriched their knowledge that they had acquired at 'their faculties', to their own benefit and to the benefit of the new generations that they will teach.
